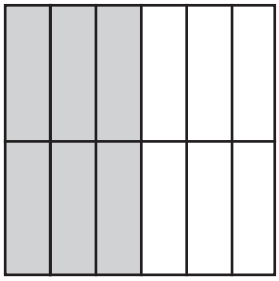
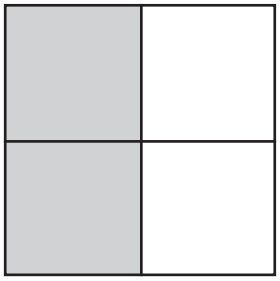
Het vereenvoudigen van breuken

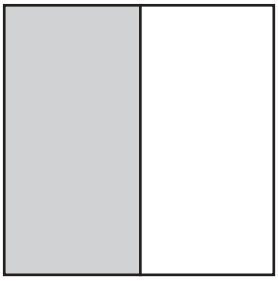
Vereenvoudigen: Er ontstaan minder delen, daarvoor echter grotere. De totale grootte blijft gelijk.



$\frac{6}{12}$



$\frac{2}{4}$



$\frac{1}{2}$

Vereenvoudig!

$\frac{3}{12}=$ $\frac{25}{100}=$ $\frac{16}{32}=$ $\frac{37}{9}=$ $\frac{8}{14}=$

$\frac{3}{9}=$ $14\frac{24}{72}=$ $\frac{88}{8}=$ $=$ $\frac{5}{4}=$ $\frac{23}{8}=$

$\frac{23}{46}=$ $1\frac{16}{9}=$ $\frac{250}{50}=$ $=$ $\frac{12}{3}=$ $\frac{15}{90}=$

$\frac{13}{4}=$ $\frac{105}{15}=$ $\frac{12}{39}=$ $1\frac{20}{4}=$ $\frac{68}{34}=$

Met welk getal werd hier vereenvoudigd?

Wordt hier eerlijk gedeeld?
